Convert Multiple BMP Files To JPG Files Software With Registration Code

Convert Multiple BMP Files To JPG Files Software is a simple-to-use application that, as the name says, gives you the possibility to turn BMP images into JPG format in bulk. It enables you to adjust the JPG quality and doesn't contain any other notable options. Simple installation and interface Installing this tool is a fast and easy job that shouldn't give you any trouble, thanks to the fact that the wizard has only familiar steps. As far as the interface is concerned, Convert Multiple BMP Files To JPG Files Software adopts a small window that shows all options available. Convert image files easily You can add as many BMP photos as you want to the task list from files or entire directories, adjust the output JPEG quality by moving a slider, as well as modify the output directory if you're not satisfied with the default option. A message dialog appears on the screen at the end of the task. The new JPEG photographs are automatically named after the original BMP files, and the utility overwrites files with the same name without any confirmation. Apart from the fact that you can consult a help manual online, there are no other notable options available here.

Evaluation and conclusion As we expected, it carried out tasks rapidly in our tests, during which it remained light on system performance, since it needed a low amount of CPU and RAM to work properly. No error dialogs popped up and it didn't hang or crash. On the other hand, Convert Multiple BMP Files To JPG Files Software features limited options for image file conversion, especially when taking into account that there are many apps out there offering the same functions (and more) for free. However, you can test it for yourself to make that decision.

- 1) Unzip the above archive.
- 2) Run it from the folder where you've just unzipped the archive.
- 3) The program will open and you'll be able to choose the conversion directory.
- 4) Convert images in bulk and select the output directory.
- 5) Wait till the work is done. To run the program for the first time it will ask you to install it. After that, it will run as an administrator and do its thing.
- 6) Use the produced files.
