Alpha Icon Creator is a lightweight Windows application whose sole purpose is to create 16, 24, 32, or 48-bit icons from images in just a few steps. As the name of the tool implies, the app creates icons with alpha channels, which means you are able to customize the transparency of the images. Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you to need to create icons on the fly. Alpha Icon Creator sports a clean and straightforward interface that allows users to add files by using the built-in browse function, so you cannot rely on the "drag and drop" support. The application offers support for BMP and GIF file formats, and lets you select the color to be used as a transparent layer. What's more, the utility offers users the possibility to select the icon size from a predefined list or add a custom value to the list, and specify the icon name and saving directory. Since there aren't any configuration settings even less experienced users can master the entire process with minimum effort. During our testing we have noticed that the tool carries out a task very quickly and without errors throughout the entire process. It manages to remain light on the system resources, so it doesn't affect the overall performance of the computer, nor interfere with other programs' functionality. To sum it up, Alpha Icon Creator offers a simple software solution when it comes to designing icons on the fly. Key Features: -Full control over the color and alpha value of icons created with Alpha Icon Creator -Support for BMP and GIF formats -Save icons into any directory you like -Select the icon size from a predefined list or enter custom values -Select the name of the image used as a transparent layer -Operates as a standalone application which doesn't interact with the Windows registry -Supports any Windows operating system -Portable, it doesn't leave any traces on the computer The simple, reliable and easy-to-use program is ideal for small and medium-size businesses that need to create logos from photos in very little time. Besides logo creation, Logo Studio enables users to create professional, eye-catching logos within few mouse clicks. In addition to the standard logo creation options, users can create watermarked

To sum it up, Alpha Icon Creator offers a simple software solution when it comes to designing icons on the fly. How does the tool work? Once you're done with the image editing process, the tool offers a wide selection of icon formats, allowing users to choose them among the following: ICO, ICO8, ICO16, ICO24, TGA, PNG, BMP, and GIF. The program also allows you to change the title, icon color and transparency, as well as the name and path where it will be saved. Thanks to the "Round corners" function users can add a circular icon or fit it into a rounded border. Moreover, to avoid icon distortion the program is able to generate 22, 24, 32, and 48-bit Windows icons from the images you selected. What's more, it features a special feature for Windows users – "Grab window". To use this feature you need to
